Empowering accountants to scale with confidence

You're great at what you do, let's take it further

Running an accountancy practice today is tougher than it's ever been. You're juggling rising compliance demands, constant regulatory change, fast-moving technology, talent shortages, pricing pressure, and ongoing cashflow stress—all while trying to deliver great client service and grow your firm. One of the biggest challenges facing practices right now is hiring and retaining the right people, alongside the difficulty of scaling sustainably, choosing and managing the right tech stack, handling increasingly complex client issues, and running the practice itself. Add AI, credit control, practice management, and operational admin into the mix, and it can feel overwhelming.

That's where nexus, the dns network steps in. We're not a franchise; you remain fully independent, keeping your name, your clients, and your identity. Instead, we act as your growth partner, giving you the tools, support, systems, and firepower of a Top 100 UK accountancy firm, without the loss of control.

To solve the biggest problems holding practices back, dns accountants has built nexus; a platform designed to help you build the firm of the future. Nexus brings together the right people, processes, technology, and expertise to remove the operational burden of running a modern practice. From recruitment and scaling, to managing complex technical issues, AI adoption, credit control, and practice management, we take care of the hard stuff, so you can focus on what you do best: your clients, your work, and the growth of your firm."

What makes dns nexus unique?

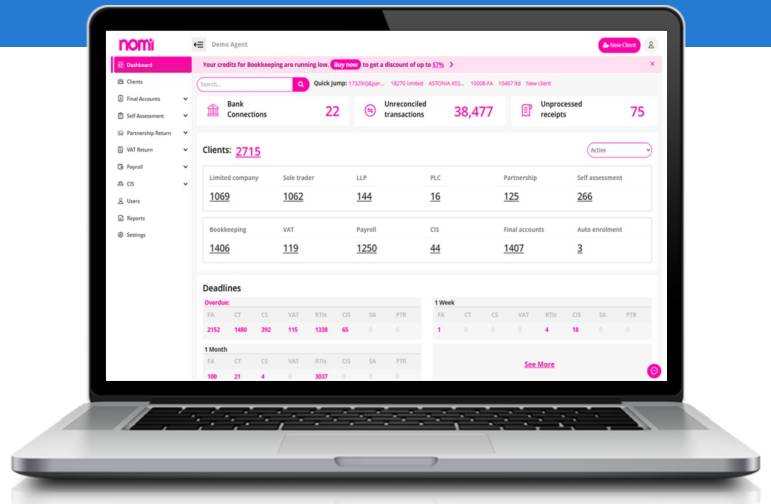

We're here to **supercharge your practice**, not control it.

Our ecosystem is designed for ambitious firms that want to stay lean, grow fast, and deliver exceptional client experiences.
